AI Meeting Minutes Generator Project Sprint

Date: **October 23, 2026** | Duration: **01:43** | Attendees: **Speaker 1, Speaker 2**

Executive Summary

Good morning, let's discuss the progress of our AI meeting mini generator project. Good morning, I have completed the initial setup of the Whisper Space to Stick environment. Yes, I tested it with the short meeting recording and it successfully generated a transcript. I still need to check the accuracy and calculate the word error rate. That part has not been completed yet.

Key Discussion Points

- Good morning, let's discuss the progress of our AI meeting mini generator project.
- Good morning, I have completed the initial setup of the Whisper Space to Stick environment.
- Yes, I tested it with the short meeting recording and it successfully generated a transcript.
- I still need to check the accuracy and calculate the word error rate.
- That part has not been completed yet.
- We need to integrate PineNot Audio and test whether it can correctly identify the different speakers.
- I should be able to complete the initial implementation by Thursday.
- I will work on the backend and fronted integration.
- We will use them for testing the complete pipeline.
- Once we have the recordings, we will test transcription first, then diarization and finally summarization.
- Let's target the first complete prototype by next week.
- I will send you the diarization's result by Thursday.

Decisions Made

- ✔ **Can you start working on the directorial model today? Yes, I will start today.**
- ✔ **Yes, let's create at least three short meeting recordings with two or three speakers.**
- ✔ **We will use them for testing the complete pipeline.**
- ✔ **Let's target the first complete prototype by next week.**
- ✔ **Let's proceed with that plan.**

Action Items & Deliverables

Task Description	Assignee	Deadline	Priority
I still need to check the accuracy and calculate the word error rate.	**Team / Unassigned**	Not specified	Normal
We need to integrate PineNot Audio and test whether it can correctly identify the different speakers.	**Team / Unassigned**	Not specified	Normal
We should prioritize that.	**Team / Unassigned**	Not specified	High

Yes, I will start today.	**Speaker 1**	Today	High
I should be able to complete the initial implementation by Thursday.	**Speaker 1**	By thursday	Medium
I will work on the backend and fronted integration.	**Speaker 1**	Not specified	Normal
We will use them for testing the complete pipeline.	**Team / Unassigned**	Not specified	Normal
Okay, I record one sample meeting tomorrow.	**Speaker 1**	Tomorrow	High
Once we have the recordings, we will test transcription first, then diarization and finally summarization.	**Team / Unassigned**	Not specified	Normal
I will send you the diarization's result by Thursday.	**Speaker 1**	By thursday	Medium

Speaker Participation & Analytics

Speaker	Speaking Time	Share %	Turns	Word Count
Speaker 1	81.0s	78.6%	15	179
Speaker 2	22.0s	21.4%	5	59

Transcript Appendix

Speaker 1 *[00:00:00 - 00:00:06]* : Good morning, let's discuss the progress of our AI meeting mini generator project.

Speaker 1 *[00:00:06 - 00:00:13]* : Good morning, I have completed the initial setup of the Whisper Space to Stick environment.

Speaker 2 *[00:00:13 - 00:00:16]* : Great, were you able to test it with an audio file?

Speaker 1 *[00:00:16 - 00:00:23]* : Yes, I tested it with the short meeting recording and it successfully generated a transcript.

Speaker 1 *[00:00:23 - 00:00:29]* : I still need to check the accuracy and calculate the word error rate.

Speaker 1 *[00:00:29 - 00:00:32]* : Okay, what about the speaker directorial model?

Speaker 1 *[00:00:32 - 00:00:35]* : That part has not been completed yet.

Speaker 1 *[00:00:35 - 00:00:42]* : We need to integrate PineNot Audio and test whether it can correctly identify the different speakers.

Speaker 1 *[00:00:42 - 00:00:47]* : We should prioritize that.

Speaker 1 *[00:00:42 - 00:00:47]* : Can you start working on the directorial model today?

Speaker 1 *[00:00:47 - 00:00:54]* : Yes, I will start today.

Speaker 1 *[00:00:47 - 00:00:54]* : I should be able to complete the initial implementation by Thursday.

Speaker 1 *[00:00:54 - 00:00:58]* : Perfect.

Speaker 1 *[00:00:54 - 00:00:58]* : I will work on the backend and fronted integration.

Speaker 1 *[00:00:58 - 00:01:06]* : Why you work on diarization?

Speaker 1 *[00:00:58 - 00:01:06]* : Sounds good.

Speaker 1 *[00:00:58 - 00:01:06]* : Do you also need sample meeting recording for testing?

Speaker 2 *[00:01:06 - 00:01:11]* : Yes, let's create at least three short meeting recordings with two or three speakers.

Speaker 2 *[00:01:11 - 00:01:15]* : We will use them for testing the complete pipeline.

Speaker 1 *[00:01:15 - 00:01:19]* : Okay, I record one sample meeting tomorrow.

Speaker 1 *[00:01:15 - 00:01:19]* : Great.

Speaker 2 *[00:01:19 - 00:01:25]* : Once we have the recordings, we will test transcription first, then diarization and finally summarization.

Speaker 1 *[00:01:25 - 00:01:31]* : And after that, we can compare the generated minutes without manually prepared reference minutes.

Speaker 2 *[00:01:31 - 00:01:35]* : Exactly.

Speaker 2 *[00:01:31 - 00:01:35]* : Let's target the first complete prototype by next week.

Speaker 1 *[00:01:35 - 00:01:40]* : Agreed.

Speaker 1 *[00:01:35 - 00:01:40]* : I will send you the diarization's result by Thursday.

Speaker 1 *[00:01:40 - 00:01:43]* : Perfect.

Speaker 1 *[00:01:40 - 00:01:43]* : Let's proceed with that plan.
